

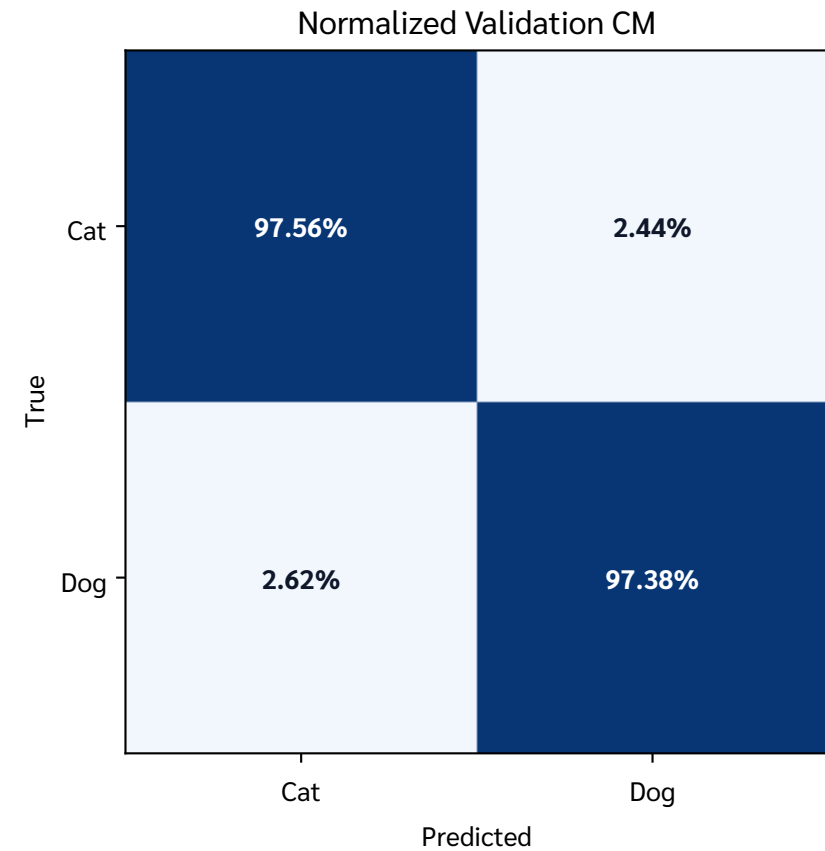

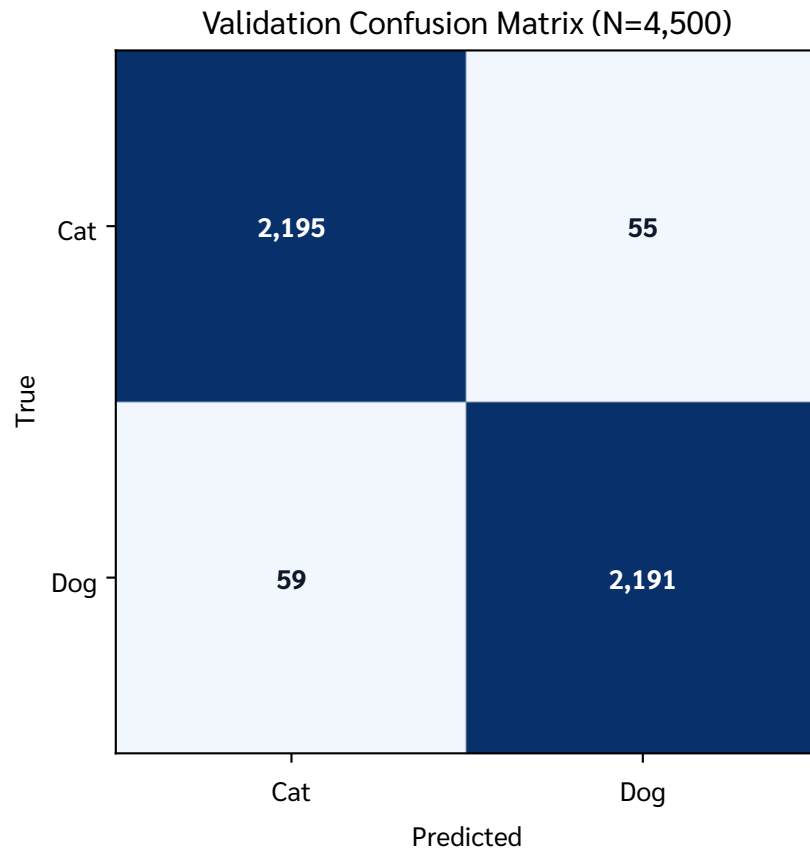

Figure 4: Validation Diagnostics from Preserved Cloud GPU Results

Preserved validation summaries

ROC-AUC: 0.9958
PR-AUC: 0.9961
Threshold: 0.50
Cat=0, Dog=1

Evidence boundary

Raw validation probabilities are not stored in this local repository. ROC/PR curves are therefore not reconstructed during static remediation.

The Notebook code generates both curves when run in the authorized Cloud GPU environment.
